

Home Medical Equipment - Products and Services

ThedaCare At Home's team of professionals works closely with the patient, caregiver, and physician in providing evaluation, fitting, training, and follow-up for all home equipment needs. We offer state-of-the-art equipment, comprehensive services and patient education to ensure maximum function and ongoing benefits.

Equipment & Products

Ambulatory Aids

Products include canes, crutches, standers, gait trainers, specialized walkers, orthopedic braces and supports. Our medical equipment specialists can provide evaluation, fitting, training and follow-up with the patient, caregiver and physician.

Aids for Daily Living

ThedaCare At Home offers quality products to improve function and independence in daily life. Our products include bathing aids, lift chairs, ostomy supplies, personal care and skin care products and toilet aids.

Auto CPAP Machine

Auto CPAP machines monitor your breathing, breath by breath, detect obstructive sleep apnea and automatically apply pressure when you stop breathing. These machines are prescribed by a physician and our Respiratory Therapists will help with patient education and training.

BiPAP Machine

The BiPAP machine is prescribed by a physician when a patient requires assistance with breathing. The BiPAP machine does two things – it helps push air into the lungs and helps hold the lungs open to allow more oxygen to enter the lungs. Our Respiratory Therapists will help with patient education and training.

Breast Pumps

Breast milk is the best milk for babies. That is why more than half of all mothers begin by breastfeeding their babies. To make the breastfeeding experience as easy and comfortable as possible, ThedaCare At Home offers breast pumps for sale and rental.

Breast Forms

Breast forms come in a variety of styles and shapes. These externally worn breast forms help to restore the body's natural balance in a comfortable and convenient manner.

Compression Garments & Stockings

Stop by any of our convenient retail locations and talk to our certified staff to answer all of your questions and fit you with the appropriate Jobst® Medical Leg Wear stockings in a variety of styles and colors. Whether you have tired, aching legs, varicose veins or swollen ankles, the #1 Physician recommended brand of compression hosiery can make a difference for you!

CPAP

ThedaCare At Home offers Continuous Positive Airway Pressure (CPAP machines) to help treat your obstructive sleep apnea. These machines are prescribed by a physician and our Respiratory Therapists will help with patient education and training.

CPM Machines

Continuous Passive Motion machines are used to regain range of motion in a joint after an injury and/or surgery. CPM machines are prescribed by a physician and our trained staff will assist you in their use.

Diabetic Products

Helping people with diabetes live life without limits is what ThedaCare At Home is all about. Our diabetic products and customer care are designed to make regular self-monitoring accurate and convenient, giving you the information you need to help manage your diabetes on a daily basis.

Diagnostic Products

ThedaCare At Home provides many types of diagnostic products such as, blood pressure monitors, thermometers, stethoscopes, scales, and pulse oximeters, just to name a few.

Hospital Beds

ThedaCare At Home offers manual, semi-electric and fully electric adjustable beds for your home use. From basic features like head/foot controls to advanced features like hi-low adjustment and pressure reduction, our DME specialists can help you zero in the right choice for you.

Incontinence Supplies

Urinary incontinence affects 13 million Americans. Most bladder control problems happen when muscles are weak or too active. Problems may also happen when nerve signals don't work properly. That is why, ThedaCare At Home offers a wide assortment of incontinence supplies including adult diapers, waterproof protection for beds and chairs in the form of disposable underpads, and specialty skin care products formulated to moisturize, protect, cleanse and deodorize.

Lift Chairs

ThedaCare At Home offers several types of lift chairs including Pride Mobility® and Action Lift Chairs®, just to name two. Lift chairs do more than just service a need. Rather, our chairs are designed to be an integral part of your home décor; a fine furnishing that you will use and enjoy for many years to come. For that reason, we offer a broad range of Lift Chair models with colors and features of universal appeal.

Lymphedema Pumps

Lymphedema affects men, women and children causing severe swelling of a limb or other body part. Our lymphedema pumps are designed to promote venous and lymphatic circulation, and remove edema from the extremity by progressively moving fluid through the affected limb.

Muscle Stimulators

Electronic muscle stimulators use a very mild electrical current to exercise your muscles and give you tone, strength and increased range of motion. They can also alleviate back pain, chronic neck, shoulder, and knee problems. These units are prescribed by a physician and the therapy is provided under the direction of a ThedaCare At Home professional.

Nebulizer therapy

A nebulizer changes liquid medicine into fine droplets (in aerosol or mist form) that are inhaled through a mouthpiece or mask. Nebulizers can be used to deliver airway-opening medications. A nebulizer may be used instead of a metered dose inhaler. It is powered by a compressed air machine and plugs into an electrical outlet. These units are prescribed by a physician and your ThedaCare At Home respiratory therapist will guide you in the use of your nebulizer and answer any questions or concerns you may have.

Orthopedic Braces/Supports

Assisting people with disabilities, injuries related to sports or other activities and problems associated with the aging process is important to us. Helping you regain your strength and mobility and return to your normal level of activity without pain or discomfort is our goal. For your convenience, we provide orthopedic braces and supports that are individually measured and fitted.

Ostomy Supplies

Whether it's for a colostomy, ileostomy, or urostomy, each ostomy system is designed with the wearer's lifestyle in mind. Systems are made with an odor-barrier material and they are lightweight. They maintain a low profile under clothing and offer a wide range of choices. ThedaCare At Home offers a wide variety of Convatec® and Hollister® products.

Oxygen (concentrator, liquid, compressed, demand devices)

ThedaCare At Home offers a wide variety of oxygen systems designed to give ambulatory patients greater freedom and independence. Our trained respiratory therapists will educate and train you regarding your therapy.

Patient Lifts

Designed to meet the needs of the caregiver, as well as, the patient, our power lifts provide a safe alternative to manual lifting. We offer a wide variety of lifts that are durable, yet functional. In addition, our lifts provide more security and comfort for the patient during transfer, while the streamlined design promotes less obstruction and greater ease.

Post Surgical Camisole

A Post surgical camisole is a garment that many women prefer immediately after surgery. They are designed to offer a natural, comfortable fit. This will help you regain confidence until the time comes to make the next step in your recovery.

Post Surgical Mastectomy Products

ThedaCare At Home has specially trained and certified female specialists available to help you through this challenging time. With the expertise and experience of our staff, we are confident that we will be able to make this experience as personalized and successful as possible for you. Our trained, professional staff are here to help you to look and feel your very best. For specialized products see our listings under breast forms, post surgical camisoles, and specialty bras. Swimsuits, wigs, turbans, and skin care products are also available upon request. These are all items that will help you maintain self-confidence and self-respect.

Pressure Relief and Wound Care

Prevention is better than cure – this applies particularly to pressure sores which are painful and slow to heal. It is important to identify those who are at risk and to intervene early with strategies for prevention. ThedaCare At Home offers many types of pressure relief products that help prevent tissue breakdown. Our wound care products are designed to create and preserve the optimum wound healing environment. This is accomplished by helping to prevent the occurrence of factors that can inhibit the healing process. By controlling these factors, we help provide an infection free, moist, clean wound bed. Our variety of wound care products help prepare the wound for healing.

Scooters

Scooters have always been a comfortable and dependable approach to personal mobility. They are quiet, smooth riding, durable, and easy to operate. Our scooters are available in a broad range of models designed with the lifestyles of our clients in mind. We also offer an extensive list of accessories that allow for personal customization, based on your own preferences.

Specialized Seating Devices

Some customers need special equipment to help them sit and move around in their environment. Our certified Rehabilitation and Mobility staff provides comprehensive customer care and quality equipment to maximize function. Our staff works closely with customers in selecting equipment and designing specialized seating systems to meet their needs.

Specialty Beds

This term is used to describe a group of medical devices and systems that are designed for prevention and treatment of bedsores. Specialty bed systems combine a hospital bed frame and mattress in one unit. ThedaCare At Home offers a variety of specialty beds including pressure reducing, pressure relief and advanced pressure reducing equipment.

Specialty Bras

These specialty bras are designed to securely hold the breast form in place—ideal for every woman who wants to maintain the same active lifestyle she always had.

Stress Relief Products

Stress can be defined as any physical, emotional, or chemical event or factor that causes mental or physical tension. Poorly managed stress can result in anxiety and tension, headaches, or any number of other symptoms. ThedaCare At Home offers a variety of stress relief products to help you manage your stress level.

Tens Units

A TENS unit (Transcutaneous Electrical Nerve Stimulation) sends bursts of electrical impulses through the skin to the nerves. These impulses are controlled and may induce the nervous system to release its own natural substances, which reduce pain signals reaching the brain.

Traction Devices

Traction is used to manage fractures in an effort to realign broken bones. It is often used as a temporary measure, when operative fixation is not available or preferred. Our traction devices are effective, easy to use, and designed to meet the healthcare industry's trend towards home healthcare.

Visual Assistance Products

ThedaCare At Home provides many types of visual assistance products including magnifiers. Ask our DME specialists for more information.

Wheelchairs

ThedaCare At Home offers many types of manual and powered wheelchairs for your home care needs. Our wheelchairs offer compact design and dependable rear-wheel drive that makes it easy to maneuver around obstacles inside and outside the home.
