

ILLUMINATE THE POSSIBILITIES

SHINING LIGHT ON
CLEAR SOLUTIONS TO
HEALTHCARE COSTS

“ThedaCare At Work gives us quick access, responsive communication and competitively priced services. We’ve had a very good experience.”

— Sandra Neisen, Human Resources Director, City of Appleton

Reducing healthcare costs is difficult. You’ve looked at all the usual options – increased deductibles, bigger co-pays, less comprehensive plans – and you’re still coming up short. We’re not surprised. Maybe it’s time to look broader – to look at what poor health actually costs. Are high-risk behaviors a worry? Are poor diet and exercise habits signaling obesity, diabetes, heart disease concerns? Are injuries inhibiting performance? Are emotional issues causing distractions? We know the best way to reduce healthcare costs is to improve health, even though it’s challenging. What’s most perplexing is understanding exactly how you can promote health that

delivers bottom line results. That’s where we’re different. At ThedaCare At Work, we systematically track and measure the results that matter. Our approach prompts healthier lifestyles that result in lower overall healthcare costs.

ThedaCare At Work is a division of ThedaCare – a regional healthcare provider with an international reputation for lowering costs and improving quality, or as we like to say, for delivering better value. Everything we know about measuring performance and improving outcomes is integrated into ThedaCare At Work.

Solutions that Work for You

If you're serious about reducing your direct and indirect health care expenses, we're ready to partner with you. Our four product lines offer many choices for creating a custom approach that respects your resources, aligns with your company's culture and delivers real results. There isn't one answer to solving employee health issues, to bringing down health care costs. Every business is different. Our approach allows you to select the options that work for your company – options that deliver results.

OUR PRODUCTS

Wellness – Healthier employees and families mean you spend less on health care. Period.

Onsite Clinic – A healthcare provider right there, at work, offers sick and injured employees a fast, convenient, lower-cost alternative. That's savings.

Employee Assistance Program – Employees who cope better perform better, from individuals to corporate teams. Our extensive EAP services save money, and frayed nerves.

Occupational Health – Get your employees back to work quickly and safely to keep productivity up and absenteeism down.

YOU CHOOSE

The **products** that meet your needs.

The level of **service** within each product line.
