

# Updates in Trauma Care

The Trauma Center at ThedaCare Regional Medical Center-Neenah presents

## 2019 Trauma Symposium

**Tuesday May 28, 2019 0730-1600**

Fox Valley Technical College, Entrance 16, Appleton, Wisconsin

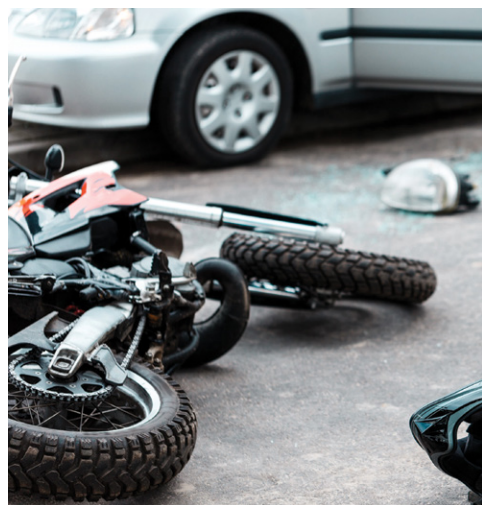

# Updates in Trauma Care 2019 Trauma Symposium

## Overview

As one of nine American College of Surgeons (ACS) nationally verified Level II trauma centers in the state of Wisconsin, the Trauma Center in Neenah is dedicated to providing comprehensive, multidisciplinary care for adult and pediatric patients. As such, we recognize the need and responsibility to educate the medical community and increase awareness in new developments in trauma care.

Updates in Trauma Care 2019 is designed to update physicians, nurses, EMS personnel, and other interested individuals on current procedures, accurate assessments, and appropriate management of patients with trauma related injuries from the pre-hospital arena, to the emergency department, intensive care unit and beyond. Our challenge is to provide optimal care to the injured victim and their families in a changing environment. The Trauma Center in Neenah is proud to offer this one-day conference. Regional and local presenters will be featured during this one-day program.

# Updates in Trauma Care 2019 Trauma Symposium

**Tuesday May 28, 2019 0730-1600**

Fox Valley Technical College, Entrance 16, Appleton, Wisconsin

## Learning Outcomes

**Purpose Statement:** Participants will be able to increase their awareness about current procedures, accurate assessments, and appropriate management of patients with trauma related injuries from the pre-hospital arena, to the emergency department, intensive care unit and beyond.

Objectives for this educational session include:

1. Review best practices in trauma care throughout the continuum.
2. Discuss integration with Emergency Medical Response Teams (police, fire, preparedness, hospital system, regional disaster, etc.) to optimize response to mass casualty situations.
3. Identify recommended practices in care provided in an ED/OR at receiving Trauma Center facilities.
4. Explore the scope of care provided by an air medical team and impact on care of patient.
5. Understanding the perspective of a trauma injury survivor.
6. Increase awareness and review of best practice through rapid fire presentations.
7. Considerations for agricultural related mechanisms and patterns of injury.
8. Review current practices throughout the continuum that lead to successful organ procurement.
9. Identify special considerations in care of geriatric patients.
10. Provide "Stop the Bleed/Bleeding Control Basic Course" as established by the American College of Surgeons.

## Conference Location

Fox Valley Technical College, Entrance 16  
1825 North Bluemound Drive  
Appleton WI 54912
